

# 3 | CRITERIA FOR DETERMINATION OF PACKAGING WASTE

In order to recognize whether something is a form of packaging, consider the different types of packaging.

## There are 4 types of packaging:

**1. Packaging as integral part of the product, which contains and protects the product during its life cycle, as well as all elements intended for its use, consumption or joint storage.**

### PACKAGING:

CAKE BOX  
THE FOIL AROUND THE CD BOXES.

### NOT PACKAGING:

TOOL BOX  
TEA BAG  
LAYER OF FRANKFURTERS

**2. Product designed and intended to be filled in the moment of the sale, i.e., a product that can be filled or used for storing food, as a result of which it becomes packaging**

### PACKAGING:

PAPER AND PLASTIC BAGS FOR TRANSFER  
PLASTIC PLATES AND CUPS  
PLASTIC FOIL FOR FOOD  
SANDWICH BAGS  
ALUMINUM FOIL

### NOT PACKAGING:

PLASTIC TABLEWARE

### 3. Packaging parts and accessories integrated in the packaging are considered as part of the packaging

#### PACKAGING:

LABELS PUT DIRECTLY ON THE PACKAGING OR ATTACHED TOGETHER

#### PACKAGING PARTS ARE:

EYE LASH BRUSH, INTEGRAL PART OF THE MASCARA LID

LABELS ATTACHED TO THE OTHER PARTS OF THE PACKAGE

PACKAGING STAPLES

PLASTIC POCKETS FOR PAPER SUPPORT

MEASURING CAP – INTEGRAL PART OF A DETERGENT LID

### 4. Long life packaging
